Autumn 1949

1.

the Soviets carried out maneuvers in the Porkkala area during the autumn of 1949 in cooperation with their "opposite numbers" on Naissaare and at Baltiiski Port. It was soon observed, however, that the firing heard was not typical gunfire. Much heavier detonations were heard first, followed by a continuous noise caused by the projectile itself.

experts consider it possible that the Soviets have rocket sites of the V-2 type at Porkkala, Baltiiski Port, and Naissaare, since the same kind of firing has been heard from all three places.

Prior to 16 January 1950

2. The USSR has developed, with the aid of German technicians and Naval officers, a radio guided torpedo which can be launched at speed by aircraft, ship, or submarine. It can even be left floating or moored by any type of vessel and then activated by remote control and guided. The guiding apparatus can be either on land, if at short range, or on a ship, aircraft, or submarine. Similar devices are under development for use in the air and for launching from aircraft and guiding to the ground or other air target.
